Name: _____

Section: _____

Today's Goals:

- (TBA)

Today's Question(s)

(TBA)

QOTD: What's the coolest thing you learned in CS70?

Goals:

- Reflect on everything we accomplished this semester!

That's all Folks!

Final Exam

Format is same as midterms

- take-home, untimed

Available by Friday at 5pm

- Pick up in the same bins as the midterms

Due by Friday, Dec. 20 at 5pm

- Turn in your midterms with your final

What have we learned?

About writing "good" programs? About the C++ memory model? About C++ programming techniques? About designing classes? About program development with UNIX tools? About computational complexity? About particular languages and language features? About data structures (abstract concepts and implementations)?

Brainstorm: 8 minutes

Idea generators: call out things big and small related to this topic
Scribes: write down the ideas

You can switch roles!

Goal: quantity, not quality(we'll deal with quality next. . .)

- Nothing is too big or too small
- Nothing is better than anything else

Organize, cull down, shape (10 minutes)

How might you start to arrange / organize / explain this topic? Can you make sub-categories?

What's most important?

What's "good to know", but not that important?

What's unimportant or unrelated?

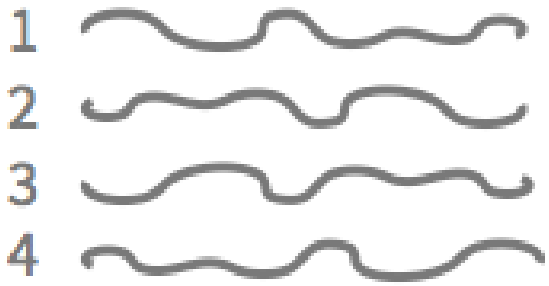
What do you feel you can explain clearly?

What is not yet clear?

Make Your Poster (20 minutes)

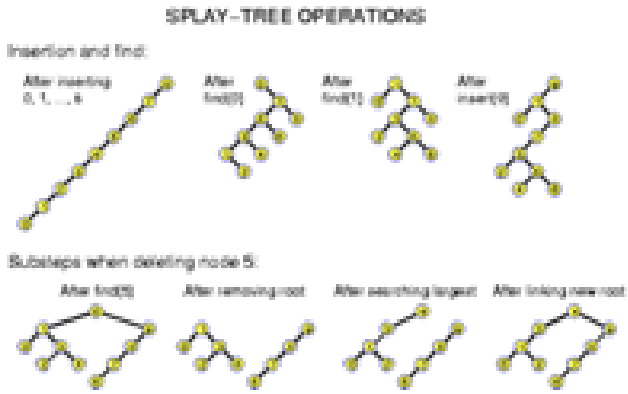
Include things that *aren't* yet clear!

13 things you **need** to know about C++ before you turn 25



...

I thought it was a stick! What happened next *shocked* me ...



Advertise! (5 minutes)

Who should see your poster?

How will their day/ week/year be improved?
